Dear Mr. Johnson:

Our agency is currently investigating the pros and cons of migrating some of our data to mass storage media. It has been brought to our attention that your agency has recently completed an evaluation of the technology available and have arrived at conclusions either in favor of or against migrating to mass storage or other alternatives. Therefore, in the interest of promoting interagency technical cooperation, I would like to pursue the possibility of discussing the strictly technical aspects of your studies and the resulting conclusions.

If such an exchange is possible, please contact Mr. Steve Feit of my staff on (301) 594-6650 at your earliest convenience.

Thank you.

Sincerely,

Patrick M. Mooney for
Mr. Felix A. A. Rausch
Move Project Manager
Office of Systems

Approved by D/ODP.

Meeting arranged for 31 Aug with Engineering Division.

Mr. Bruce Johnson
Director, Office of Data Processing
Central Intelligence Agency
Washington, D.C. 20505

Dear Bruce:

I would like to take this opportunity to thank you and your staff for the preparation and time arranged for our recent visits. The insight you provided on your automated computer equipment assessment and tracking system is proving to be extremely valuable in assisting us with our new system design.

STAT the other members of your staff demonstrate a responsible and perceptive commitment to the ongoing needs of computer resource management. The progress your organization has made in this area is extremely impressive and we hope to closely parallel your system's success.

Additionally, the classification/organizational issues we discussed were very enlightening and I look forward to our continued discussions on these topics.

If we can assist you with any of the discussed issues, please don't hesitate to call me. My telephone number is 301-594-2447.

Sincerely yours,

Carl L. Baker
Deputy Director
Office of Systems Operations

I thought you would be interested in this word of appreciation from the SSA people we briefed a few weeks back. It's good to know that outsiders appreciate what our engineering people have accomplished.
